Jeany Rush Against themselves	TO: COMMITTEE ON TRANSPORTATION & ENERGY  RE: SB25-022 Applying Artificial Intelligence to Fight Wildfire  Sponsors: Baisley, Marchman, Weinberg, Boesnecker  FROM: Jeany Rush, Colorado Springs Concerned Citizen  VOTE: NO  This bill is yet another example of irresponsible, and unclear demand on the state budget,  in a time when we are challenged to just keep the LIGHTS' on.  You are wanting \$7,500,000 for studies, and to develop a plan for a multitude of things  to mitigate fires, yet, currently there are methods, plans that are being ignored totally  to manage wild areas, proper forest management, and planning for fires.  Further, you want to allow third parties to be used. Who are they? are they conflicts of  interest like the eminent domain for CO2 (fake safe) pipelines? You also allow gifts, grants, donations  from private and public sources. Again who are they?  You should know, and must know, the data centers for AI being planned, placed will eat up tons more  electric and water, and it seriously needs to be seen for the out of common sense it represents.  We have grid vulnerabilities, and yet we create more dangers to our grid. We are talking who is planning  to make profits from all of the AI, out of control, when we need to work on these things in our local and  states with the known remedies. We simply do not have legislatures that are willing to do them.  Add the USDA EPA and other BLM organizations which have ignored proper land management for

	<p>globalist over-reaching methods to take control away from the people that actually own it all.</p> <p>This is too open-ended and squishy. Not a wise direction. Too much is given to a potential entity</p> <p>which could create much more chaos, havoc, and uncertainty, not to mention true danger.</p> <p>NO NO NO</p>
